

EVEN ODD STRATEGY

This strategy works alone with bot , Don't do manually

REQUIREMENTS

- Use 1 tick.
- Use volatilities with 1s ..Eg 100 1s, 75 1s , 50 1s
- Use speed bot for faster execution.

When trading EVEN

1. Make sure Green bar is at Even digit with 12.5% and above.
2. Make three of even digits are above 10.5%
3. Red bar should be on a EVEN digit and should be less than 9.5%

ENTRY POINT WHEN TRADING EVEN

- Make sure the Even digits are increasing as the moving cursor hits on them.
- Wait for the cursor to hit on **TWO ODD DIGITS** then It hits the digit with the GREEN BAR then RUN your bot.

Take your time , don't force the market if the conditions are not yet met.

When trading ODD

4. Make sure Green bar is at ODD digit with 12.5% and above.
5. Make three of odd digits are above 10.5%
6. Red bar should be on a ODD digit and should be less than 9.5%

ENTRY POINT WHEN TRADING ODD

- Make sure the ODD digits are increasing as the moving cursor hits on them.
- Wait for the cursor to hit on **TWO EVEN DIGITS** then It hits the digit with the GREEN BAR then RUN your bot.

Take your time , don't force the market if the conditions are not yet met.
