MKOREAN EVEN ODD STRATEGY by MKOREAN WWN

Kindly i have 3 strategies

1.FIRST STRATEGY

WHEN TRADING EVEN MARKET

- Make sure GREEN BAR is on Even Market
- The digit with the green bar should be above 12.1% and above.
- Make sure atleast three even numbers have 10% and above to increase the chances of moving cursor to land on Even numbers
- Make sure RED BAR is on Even market.

ENTRY POINT WHEN TRADING EVEN MANUALLY
 Wait for the cursor to hit the EVEN digit with above 10% then immediately it enters the digit with the GREEN BAR and the digit increases the click EVEN.

ENTRY POINT WHEN TRADING EVEN WHILE USING A BOT
Wait the moving cursor to hit two ODD numbers then wait for the hit the digit with green bar (EVEN) the RUN your BOT

WHEN TRADING ODD MARKET

- Make sure GREEN BAR is on Odd Market
- The digit with the red bar should be above 12.1% and above.
- Make sure atleast three red numbers have 10% and above to increase the chances of moving cursor to land on odd numbers
- Make sure RED BAR is on Odd market.

ENTRY POINT WHEN TRADING ODD MANUALLY
 Wait for the cursor to hit the ODD digit with above 10% then immediately it enters the digit with the GREEN BAR and the digit increases the click ODD.

ENTRY POINT WHEN TRADING ODD WHILE USING A BOT
Wait the moving cursor to hit two EVEN numbers then wait for the hit the digit with green bar (EVEN) the RUN your BOT
